Generative AI have just arrived but the technology keeps moving forward nowadays

Generative AI

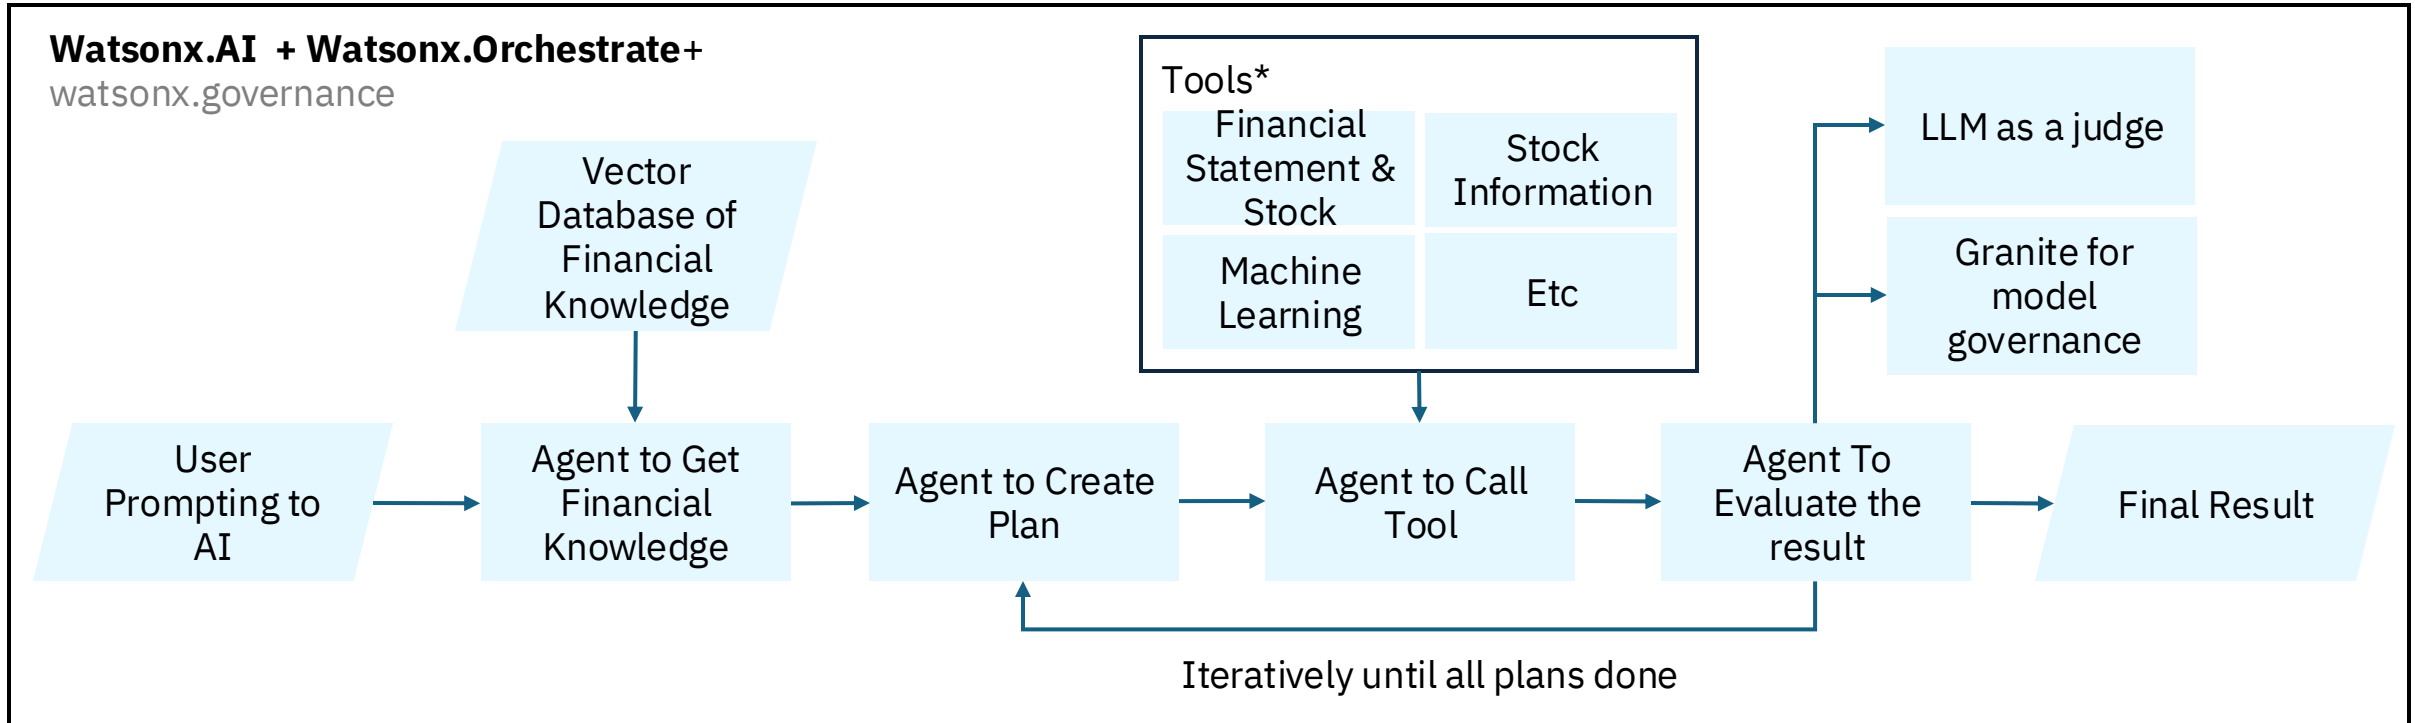

Agentic AI

Example of Supplier Company QnA

Generative AI Concept to check supplier company in market capabilities

Explanation of the Concept

When handling supplier capability assessments, Agentic AI can provide greater flexibility in answering different types of questions. Its planner capabilities automatically determine the processes needed to address specific inquiries, mimicking how a procurement analyst or sourcing expert evaluates supplier data

* Tools can be added as much as possible
